

DAY 1 – PROBLEM (Attention Grab)

Subject: Are you still paying \$29/month for invoices?

Hey,

Quick question...

Are you still paying monthly for invoicing tools?

Because most people don't even realize...

They're spending \$300+ every year just to create invoices.

And the worst part?

- 👉 It still takes time
- 👉 It still feels complicated
- 👉 And you don't even own the tool

I recently found a simple alternative that changed everything.

No subscriptions. No login. No internet needed.

Just open → create → download.

DAY 2 – PAIN (Agitation)

Subject: This is why invoicing feels frustrating...

Hey,

Let's be real...

Creating invoices shouldn't feel like a task.

But somehow it does.

You open your tool...
Wait for it to load...
Try to fix formatting...
Then still double-check everything.

And all that...

👉 While paying monthly fees.

Makes no sense, right?

That's exactly why I switched to something way simpler.

It works instantly.
No setup. No confusion.

And the best part?

👉 You pay once... and use it forever.
